MEMORANDUM FOR: []

SUBJECT

: Proposed Revision of [] Regulatory
Issuances, Numbering

1. I see no legal objection, or any other earth shaking objection, to the proposed revision to [] It does, however, seem longer than necessary, and in fact, I wonder whether the regulation is necessary at all. Moreover, the purpose of this regulation is merely to add "34" as a number category for issuances. This problem may come up again from time to time. It seems to me this matter is so routine -- and involving an utterly unimportant matter -- that it does not warrant the expenditure in time and money to coordinate the change.

2. You will recall that [] is also up for revision. This also involves a basically mechanical matter which the RCS should be able to handle on its own. I would suggest that [] be amended by inserting in paragraph 4a., appropriate new language charging the RCS with distribution and numbering, and by rescinding []

3. The proposed revision is returned.
